Preface

The SEAMIC HEALTH STATISTICS has been published annually since 1979 as part of the SEAMIC activities sponsored by the International Medical Foundation of Japan. It has been presenting in a uniform manner, information relevant to health developments in the countries participating in the SEAMIC. The publication has been appreciated by users both in those countries and in others.

This year's issue follows the same pattern as in the 1989 edition in which certain new features were incorporated. In view of the evolving information needs of users, however, the contents of the publication will continue to be reviewed for improvements. Suggestions from the readers will be welcomed in this regard.

A considerable amount of useful data has accumulated since the first issue of this publication. By presenting the data as time series, both in graphic and tabular forms, a commemorative issue was published in 1991, entitled "Recent Trends in Health Statistics in Southeast Asia---10th Anniversary Issue of the SEAMIC Health Statistics". The readers may wish to consult that commemorative publication together with the annual issues of the SEAMIC HEALTH STATISTICS.

It is regretted that the present issue has had to be postponed for almost a year due to unavoidable reasons. It is hoped that the next issues will gradually catch up with the normal timetable.

The Editorial Board wishes to express its warmest thanks to all those in the participating countries who have made valuable contributions to the compilation of the present edition.

February, 1992

3 - 1 Ten Leading Causes of Death

	Year	1	2	3	4
(1) BRUNEI	1989	Heart Diseases	Malignant Neoplasms	Accidents, Poisoning & Violence	Pneumonia
(2) INDONESIA	1989	Parasitic and Infectious Diseases	Diarrhoea	Respiratory Diseases	Cardiovascular Diseases
(3) JAPAN	1989	Malignant Neoplasms	Diseases of Heart	Cerebrovascular Diseases	Pneumonia & Bronchitis
Peninsular Malaysia	1989	Heart Diseases and Diseases of Pulmonary Circulation	Certain Conditions Originating in the Perinatal Period	Cerebrovascular Diseases	Accidents
(4) a) MALAYSIA	Sabah	Certain Conditions Originating in the Perinatal Period	Heart Diseases and Diseases of Pulmonary Circulation	Pneumonia	Septicaemia
	Sarawak	Heart Diseases and Diseases of Pulmonary Circulation	Certain Conditions Originating in the Perinatal Period	Malignant Neoplasms	Cerebrovascular Diseases
(5) PHILIPPINES	1987	Pneumonia	Heart Diseases	Diseases of the Vascular System	Tuberculosis, All Forms
(6) SINGAPORE	1989	Cancer	Diseases of Heart	Cerebrovascular Diseases	Pneumonia
(7) b) THAILAND	1989	Diseases of Pulmonary Circulation and Other Forms of Heart Diseases	Other Accident, Including Late Effect	Malignant Neoplasm of Other and Unspecified Sites	Diseases of the Digestive System Other than Oral Cavity, Salivary Glands and Jaws

b) First 10 leading cause groups of death according to ICD Basic Tabulation List, 9 th Revision

5	6	7	8	9	10
Hypertensive Diseases	Bronchitis, Emphysema and Asthma	Septicaemia	Cerebrovascular Diseases	Congenital Anomalies	Conditions Originating in the Perinatal Period
Tuberculosis	Certain Conditions Originating in the Perinatal Period	Injuries and Accidents	Diseases of Digestive System	Neoplasms	Diseases of Nervous System
Accidents, Poisoning and Violence	Suicide	Chronic Liver Diseases & Cirrhosis of Liver	Nephritis, Nephrotic Syndrome & Nephrosis	Hypertensive Diseases	Diabetes Mellitus
Malignant Neoplasms	Septicaemia	Nephritis, Nephrotic Syndrome and Nephrosis	Congenital Anomalies	Symptoms, Signs and III-defined Conditions	Pneumonia
Malignant Neoplasms	Cerebrovascular Diseases	Accidents	Tuberculosis	Nephritis, Nephrotic Syndrome and Nephrosis.	Symptoms, Signs and III-defined Conditions
Septicaemia	Accidents	Pneumonia	Tuberculosis	Congenital Anomalies	Symptoms, Signs and III-defined Conditions.
Malignant Neoplasms	Measles	Accidents	Diarrhoeal Diseases	Avitaminosis and Other Nutritional Deficiency	Nephritis, Nephrotic Syndrome & Nephrosis
Accidents	Diabetes Mellitus	Nephritis and Nephrosis	Bronchitis, Emphysema and Asthma	Congenital Anomalies	Septicaemia
Diseases of Respiratory System Other than the Upper Respiratory Tract	Transport Accidents	Cerebrovascular Diseases	Diseases of Nervous System	Homicide and Injury Purposely Inflicted by Other Persons	Tuberculosis

10 Explanatory Notes on Vital Statistics

Crude Live-birth Rate = $(B/P) \times 1,000$

Crude Death Rate = $(D/P) \times 1,000$

where B = Number of live-births during a year

 D = Number of deaths during a year

 P = Population at middle of year

Crude Marriage Rate = $(M/P) \times 1,000$

Crude Divorce Rate = $(D/P) \times 1,000$

Crude Birth Rate = $(B/P) \times 1,000$

General Fertility Rate = $(B/F_{15-49}) \times 1,000$

where M = Number of marriages during a year

 D = Number of divorces during a year

 B = Number of births during a year

 P = Population at middle of year

F_{15-49} = Population of women at ages 15-49 at middle of year

Absolute numbers and crude rates per 1,000 live-births

Late fetal deaths: Fetal deaths after at least 28 weeks' gestation

 Fetal deaths of unknown gestational age are included

Infant deaths: Deaths under one year

Neonatal deaths: Deaths under four weeks

Post-neonatal deaths: Deaths from four weeks to under one year

Perinatal deaths: Late fetal deaths and deaths under one week

Maternal Mortality Rate is computed as the ratio of maternal deaths in a year to 100,000 live-births of the same year

Maternal Mortality Rate = $(D_p/B) \times 100,000$

where D_p = Direct obstetric deaths (Chapter XI in ICD-9) during a year

B = Number of live-births during a year

b) While the vital registration system of the whole country was revised for improvement in 1984, the registration of stillbirth has no longer been emphasized since then. The stillbirth data are therefore incomplete and not valid enough to be presented in the vital statistics.

c) As mentioned in Note b) above, the data on stillbirths are incomplete. The figures on late fetal deaths included here are those collected from hospital only.

18 Definitions Used in Hospital Statistics (WHO)

	Definition		Definition
1. Hospital	Any establishment permanently staffed by at least one physician that can offer inpatient accommodation and provide active medical and nursing care. Establishments providing principally custodial care should not be included.	7. Private Non-profit-making Hospital	Any hospital, whether subsidized by the government or not, operated on a non-profit-making basis by a non-government body, such as a religious mission, an industrial enterprise, a trust, or a philanthropic institution.
2. General Hospital (principal)	A hospital - other than local or rural hospitals providing medical and nursing care for more than one category of medical discipline (e.g., general medicine, specialized medicine, general surgery, specialized surgery, obstetrics, etc.)	8. Private Profit-making Hospital	Any private hospital (or medical establishment with beds) operated on a profit-making basis.
3. Local or Rural Hospital	A hospital, usually in rural areas, permanently staffed by one or more physicians, which in respect of their functions is also a general hospital, but provides medical and nursing care of a more limited range than that provided by principal general hospitals.	9. Bed	A hospital bed is one regularly maintained and staffed for the accommodation and fulltime care of a succession of inpatients and is situated in wards or a part of the hospital where continuous medical care for inpatients is provided. The total of such beds constitutes the normally available bed complement of the hospital. Cribs and bassinets maintained for use by healthy newborn infants who do not require special care should not be included.
4. Medical and Maternity Centre with Beds	A small unit, also known as rural health centre, bedded dispensary, a rural maternity home, etc., not permanently staffed by a physician (but by a medical assistant, nurse, midwife, etc.), which offers inpatient accommodation and provides a limited range of medical and nursing care.	10. Admission	An inpatient admission is the formal admission by a hospital of an inpatient and always involves the allocation of a hospital bed. Healthy babies born in the hospital should not be counted if they do not require special care.
5. Specialized Hospital	A hospital providing medical and nursing care primarily for only one discipline. This category does not include the specialized department administratively attached to a principal general hospital and sometimes located in an annex or separate building ; their beds (and the related data) are included with the principal general hospital.	11. Discharges (including deaths)	The number of persons, living or dead, whose stay has terminated and whose departure has been officially recorded.
6. Government Hospital	Any hospital administered by a government authority at any level, whether central, intermediate, or local.	12. Patient days	Total of daily censuses of inpatients in the hospitals during the year. Not included in the daily censuses are healthy babies born in the hospitals if they do not require special care. The day of admission and the day of discharge should be counted together as one day.

19 Definition of Medical Personnel (WHO)

	Definition		Definition
1. Physicians High (university) level	All graduates of a medical school or faculty actually working in your country in any medical field (practice, teaching, administration, research, laboratory, etc.)	7. Pharmacists/ Chemists High (university) level	All graduates of a faculty or school of pharmacy actually working in your country in pharmacies, hospitals, laboratories, industry, etc.
2. Medical Assistants Middle level	Personnel performing duties ranging from simple curative procedures for common diseases to wider medical care that may include a variety of diagnostic, curative and preventive practices. These personnel have no medical education of university level or equivalent.	8. Pharmaceutical Assistants Middle level	Personnel assisting in pharmacies, hospitals, or dispensaries to make and dispense medications, under the supervision of a pharmacist. These personnel do not have pharmaceutical education of university level or equivalent.
3. Multipurpose Health Auxiliaries Basic level	Personnel who may have no more than elementary general education and a few months of in-service training and who provide basic health services at the village level.	9. Veterinarians/ Veterinary Surgeons High (university) level	All graduates of a faculty or school of veterinary medicine actually working in your country in any field of veterinary activity, including teaching and public health.
4. Dentists/Dental Surgeons (a) High (university) level (b) Middle (non-university) level	(a) All graduates of a dental school (or faculty of odontology or stomatology) actually working in your country in any dental field. (b) Personnel qualified from a dental school of non-university level and licensed to practice dentistry in your country.	10. Animal Health Assistants Middle level	Personnel carrying out limited diagnostic, preventive, and curative veterinary services. These personnel have no veterinary education of university level.
5. Dental Operating Auxiliaries	Personnel performing a limited range of diagnostic, preventive, and curative services in dentistry. These personnel usually do not have complete dental education of university level or equivalent.	11. Professional Midwives High level (a) Non-nurse midwives (b) Nurse-midwives	All graduates of a midwifery school actually working in your country in any field of midwifery (practice in institutions and community health services, teaching, administration, private practice, etc.)
6. Dental Non-operating Auxiliaries (a) Dental laboratory technicians (b) Dental chairside	Dental non-operating auxiliaries who assist dentists and dental operating auxiliaries in their clinical work but do not carry out any independent intra-oral procedures. These dental personnel usually have technical training either in formal courses or by apprenticeship.	12. Assistant Midwives/Auxiliary Midwives Middle level	Personnel carrying out midwifery duties in normal obstetrics, in institutions and other health services, in principle under the supervision of a professional midwife. These personnel do not have the full education and training of a professional midwife.
		13. Auxiliary Nurse-midwives Middle level	Personnel performing certain nursing duties and midwifery duties in normal obstetrics, in principle under the supervision of a professional nurse or midwife. These personnel have simpler education and training in nursing and midwifery than that the professional nurse-midwife.

	Definition		Definition
14. Professional Nurse High level	All graduates of a nursing school working in your country in any nursing field (general nursing, specialized clinical nursing services in mental health, pediatrics, cardiovascular diseases, etc. - public health or occupational health, teaching, administration, research, etc.). These personnel are qualified and authorized to provide the most responsible and competent professional nursing service.	20. Medical Physicists High (university) level	All graduates of a university or faculty of natural science with qualification in physics and mathematics and special education and training in the field of medical physics.
15. Assistant Nurses/Auxiliary Nurses Middle level	Personnel performing general patient care of a less complex nature in hospitals and other health services, in principle under the supervision of a professional nurse. These personnel do not have the full education and training of a professional nurse.	21. Medical Radiological Technicians High-level Technicians	Professionals who have graduated from a school for radiological technicians and work under the general responsibility of a specialist or physician in the field of radiology. If possible, indicate the distribution of medical activity : (a) MRT (General) (b) MRT (Diagnosis) (c) MRT (Therapy)
16. Nursing and Midwifery Aids Basic level	Personnel performing specified non-technical tasks in institutions or community health services under nursing supervision. These personnel usually have on-the-job or short training.	22. Assistant Medical radiological Technicians Middle-level Technicians	Auxiliary medical radiological personnel working under the direct supervision of a medical radiological technician or under a specialist or physician. Professionally qualified engineers specialized in the prevention, control, and management of environmental factors that influence man's health adversely, e.g., in the design and operation of facilities for control and the planning and administration of environmental health programmes.
17. Physiotherapists /Physical therapists	Professional personnel treating patients by exercise, physical means, and massage, usually as prescribed by a physician.	23. Sanitary engineers High (university) level	Professional personnel other than physicians inspecting the environment, promoting measures to restore or improve sanitary conditions (food inspection, inspection of public premises, etc.) and supervising the implementation of these measures.
18. Medical Laboratory Technicians High-level Technicians	Professionals who have graduated from a school for laboratory technicians and work under the responsibility of a scientific or medical specialist. They also participate in the supervision, teaching and training of subordinate technical personnel.	24. Sanitarians High-level Technicians	Professional personnel other than physicians inspecting the environment, promoting measures to restore or improve sanitary conditions (food inspection, inspection of public premises, etc.) and supervising the implementation of these measures.
19. Assistant Medical Laboratory Technicians Middle-level	Auxiliary technical laboratory personnel working under the supervision of a professional laboratory technologist or technician. These auxiliary personnel do not have the full training and theoretical knowledge of the professional.	25. Auxiliary Sanitarians Middle-level Technicians	Personnel who perform to a limited extent the functions of a professional sanitarian but do not have the full training and theoretical knowledge of the professional.

	Definition		Definition
26. Other Scientific or Professional Personnel examples: Biochemists Biologists Entomologists Psychologists Nutritionists Dietitians Occupational therapists Speech therapists Other special therapists Health educators Health statisticians Medical record librarians	Scientific (university) or professional personnel working in the health field, but not classifiable under previous items (e.g., excluding physicians).	28. Other Health Auxiliaries and Aides examples: Microscopists Laboratory aides Dark-room assistants	Health auxiliaries not classifiable under previous items, who generally have not more than primary general education and an elementary technical training by apprenticeship or in-service training.
27. Other Technical Personnel. examples: Cardiology technicians Encephalographers Opticians Orthopaedic technicians Hearing aid technicians Health statistical technicians Medical records technicians	Technical personnel in the health field not classifiable under previous items.	29. Practitioners of Traditional Medicine/Midwifery examples: Herb doctors Ayurvedic doctors Lay medical practitioners Medicine men Acupuncturists Traditional birth attendants
